Professional Summary

Experienced Full Stack Web Developer with over 10 years of expertise in JavaScript and PHP frameworks/CMS platforms. Proficient in creating, managing, designing, and developing websites using the latest technologies and tools. Skilled in project management, including business requirements analysis, documentation in Confluence, use case development, and the successful delivery of key initiatives.

Adept in a wide range of technologies and tools, including JIRA, DevContainer, Confluence, GitHub, AWS, OpenShift, Jenkins, Atlassian Suite, BitBucket, GitLab, Docker, FileZilla, and server management tools (XAMPP, WAMP, MAMP). Also experienced in modern development frameworks and languages such as ReactJS, VueJS, NodeJS, Core PHP, CMS (WordPress), and MVC frameworks like Laravel and CodeIgniter, as well as RESTful APIs and Micro Services. Seeking an opportunity to leverage technical expertise to drive business objectives and innovation.

Committed to making a meaningful impact by dedicating 100% effort to professional and personal growth. Aspiring not only to excel as a Web Developer but also to evolve holistically as an individual, continuously enhancing skills, embracing challenges, and contributing to both organizational success and personal development.
